

MSKC SERIES

MODEL MSKC

Features

- Sealless mag drive technology - eliminates costly seal problems
- Multi-Stage design: Generates increased head at low flow rates, low power consumption, wide hydraulic envelope allows for mix and match impeller sizes
- Small footprint - avoids large impeller diameters
- Unique interconnecting drive shaft - transmits torque from magnetic coupling to first stage impeller
- Independent thrust bearings at each stage for maximum reliability
- Polypropylene or PVDF construction
- Accepts standard NEMA 56C or IEC 71/B14, 80/B14 frame motors
- Maximum working pressure 80 psi
- Maximum temperature: 180°F (82°C) - Polypropylene
220°F (104°C) - PVDF
- Maximum flow 60 gpm (12.8 m³/hr.), maximum head 100 ft. (21.3 m)

Multi-Stage is also available in a vertical design.

Typical Applications

- High pressure/low flow applications for chemical processing, spraying, bulk unload, tank transfer
- Plating recirculation/filtration, PCB etching/rinse
- Water/waste water treatment, wet scrubber
- Laboratory, pharmaceutical, photo processing

Note: numbers 1, 2, 3, 4, 5 on curves indicate impeller diameter combinations. See specifications
