Vertical Heavy Duty Pumps

Why Vertical?

The Vertical Advantage...

- No Suction Piping, Strainers or Valve.
- No Suction Flex Joints required.
- No Grouting or Foundation required.
- **NO ALIGNMENT REQUIRED!**
Automatic Pump to Motor alignment
- No mechanical seals required.
- Mechanical Seal Flush Plans eliminated.
- Less HP draw because there is no Mechanical Seal.
- Less floor space required.
- Less Suction condition problems virtually eliminates problems with Cavitation and Air Entrainment.

Design Features...

- Vertical Design eliminates The Mechanical Seal thereby eliminating the most common service item on most pumps.
 - Mechanical Seal is replaced with a non-contacting carbon Throttle Bushing. This Throttle Bushing is used for two reasons:
 - Slows down flow exiting the pump through the Shaft opening in the Stem Plate.
 - Helps protect Shaft and Impeller as the Bearings wear.
- Less Downtime and lower labor costs to repair than Horizontal pumps.

For all process services and applications, the **Gusher Vertical Heavy Duty Pumps** provide a complete, reliable and economical solution. The Gusher Heavy Duty Series Vertical Pumps are easy to operate and maintain, coming with the added benefit of substantially reduced maintenance costs, and are backed by award winning service.

Services

- Spray Booths
- Filtration Systems
- Spray Washers
- Phosphate Systems
- Paint Systems
- Coolant Systems
- ...and Many More

Custom Design

- May be Designed and Manufactured to your Application Needs

Reliability

- Heavy Duty Construction
- Cast Iron and Stainless Steel Construction

Ease of Maintenance

- Sealless
- Top Pull-Out Design

Simple Installation

- C-Faced Motors
- No Coupling Alignment

General Design Features

TYPICAL VERTICAL HEAVY DUTY PUMP CONSTRUCTION

- 1. HEAVY DUTY SHAFT**- Minimum Deflection Increases Life for less Maintenance.
- 2. HEAVY DUTY THRUST BEARING** - Double Row Thrust Bearing Minimizes Shaft End Play for more Effective Stuffing Box Sealing, Longer Mechanical Seal Life and withstands greater Axial and Radial Thrust Loads.
- 3. GREASE RETAINER** - Deflects Lubrication to the Bearing Races.
- 4. RADIAL BEARING** - Designed to withstand total Radial load of the Impeller.
- 5. SLINGER** - Controls Pumpage from climbing the shaft.
- 6. IMPELLER** - Semi-Open, Designed with back Pump-Out Vane to minimize axial Thrust. Designed to handle Solids and Stringy Material.
- 7. BARREL** - Maintenance Free Coupling Alignment.
- 8. BEARING HOUSING** - Variety of Sizes for Maximum Capability.
- 9. VOLUTE**-Centerline Design Self Venting.

- Capacities up to 10,000 GPM
- Heads to 540 ft.
- Temperatures to 1000F (537)C
- Pressures to 230 PSIG

Vertical Heavy Duty Pumps

General Series Options

Barrelmount Style

Allows for Easy Alignment

OSHA Approved Coupling Guards

Gusher provides guards around rotating parts to meet plant safety requirements.

Extended Lengths

Let us build the Pump to fit your Tank!

Discharge Pipe Extending through Mounting Plate

Available in different materials and configurations to meet your requirements.

Jacketed Ball Bearing Housing

For High Temperature Applications.

C-Face Electric Motors

Maintains consistent alignment when used with Gusher's Barrelmount Style Pump.

Couplings

Can be installed with ease. The design eliminates the need for lubrication, and therefore allows for a Smooth, Clean, Dependable and Quiet Performance.

Heavy Duty Construction

Barrel Mounted

Features...

1. **Bearings** - Oversize Heavy Duty Type, supplied with grease fittings and located above base plate out of corrosive area.
2. **Shaft** - Extra Heavy, made of High Strength Steel.
3. **Impeller** - Proven Design and external adjustable clearance increases Efficiency and Performance. Enclosed and Semi-Enclosed available.
4. **Air Space** - This feature is a real advantage when pumping Paint or other liquids that have a tendency to foam and overflow your tank. Overflow will not damage ball bearings in power frame.
5. **Motor Alignment** - Motor Mounting arrangement allows precise motor alignment in the field.
6. **Stationary Element** - Casing and Piping are held in place.

Handling a Wide Range of Applications...

- Spray Booths
- Filtration Systems
- Industrial Spray Washers
- Phosphate Systems
- Paint Systems
- Coolant Systems
- And Many More

Capacities...

Sizes in the 7550 Vertical Heavy Duty range from 1" to 8" discharge with heads up to 275 feet @ 1750 RPM. Capacities up to 2800 GPM. (3600 RPM Pumps are available by selection through a distributor or factory).

Materials of Construction...

The Gusher 7550 Vertical Heavy Duty is available with a selection of materials to meet any need. Pumps can be furnished with Cast Iron, Stainless and Stainless Fitted Construction.

Features...

- 1. Bearings** - Oversize Heavy Duty Type, supplied with grease fittings and located above base plate out of corrosive area.
- 2. Shaft** - Extra Heavy, made of High Strength Steel.
- 3. Impeller** - Proven Design and external adjustable clearance increases Efficiency and Performance. Enclosed and Semi-Enclosed available.
- 4. Air Space** - This feature is a real advantage when pumping Paint or other liquids that have a tendency to foam and overflow your tank. Overflow will not damage ball bearings in power frame.
- 5. Motor Alignment** - Motor Mounting arrangement allows precise motor alignment in the field.
- 6. Stationary Element** - Casing and Piping are held in place.

Handling a Wide Range of Applications...

- Spray Booths
- Phosphate Systems
- Filtration Systems
- Paint Systems
- Industrial Spray Washers
- Coolant Systems
- And Many More

Capacities...

Sizes in the 7600 Vertical Heavy Duty range from 1" to 8" discharge with heads up to 275 feet @ 1750 RPM. Capacities up to 2800 GPM. (3600 RPM Pumps are available by selection through a distributor or factory).

Materials of Construction...

The Gusher 7600 Vertical Heavy Duty is available with a selection of materials to meet any need. Pumps can be furnished with Cast Iron, Stainless and Stainless Fitted Construction.

Top Pull Out...

The 7600 Vertical Heavy Duty is designed to minimize maintenance. If maintenance is required, the rotating element can be removed without disturbing the mounting plate or piping. All 7600 Vertical Heavy Duty series have an external impeller adjustment for ease in maintenance and continued High Efficiency.

Proven Design...

The Gusher 7600 Vertical Heavy Duty has been designed to give Heavy Duty Pumping Service in a wide range of applications, after decades of Application-Tested and Time-Proven reliability.

Non-Clog Construction

Features...

- **Impeller-**
Designed to handle Large Diameter Solids and Fibrous Material without Clogging.
- **Handles Solids -**
Up to the same diameter as the Discharge.
- **Transitional Discharge, Concentric Volute Casing**
For Minimal Wear and Clog-Free operation.
- **Reduced Radial Loading-**
for Trouble-Free operation, even with low flows, our Vortex design allows throttling to a low performance range unacceptable to many Centrifugal Pumps.
- **Top Pull Out-**
Design Option for Quick and Easy Repairs or Switch-Outs. All "Wear" items can be Very Quickly Replaced.
- **Materials-**
Choice of Casing and Impeller Materials including Cast-Iron, Hardened Ductile Iron, CD4MCu or Alloy-20 for Chemical Compatibility and Significantly lower wear.
- **Sizing-**
From 2x2-8 through 6x8-15 offering Flow Range to 2600 GPM and Heads up to 440' TDH (190 psi).
- **Designed-**
to Pump various Liquids and Oils containing 30% or better entrained air.
- **Operates-**
23% below its first Critical Speed at any point of Operation.
- **Shaft-**
is designed to have a Maximum Total indicated Run-Out not to exceed .008 inches.

Pumps Designed to handle Solids

Caution: Not All Pumps Are Designed To Handle Bulky/Fibrous Solids or Shear Sensitive Solids

When handling certain bulky, fibrous solids, clogging can occur. Standard end suction pumps have close clearances between the impeller and casing to maintain efficiency and performance. High velocities in the casing will cause increased wear, and can degrade or shear pumpage.

Trouble-Free Operation At Low Flows

Recessed impeller pumps are reliable when operating at low flows. Gusher's Vertical Heavy Duty Vortex Non-Clog Pumps use a concentric casing reducing radial loads up to 85%. Bearing, seal and overall pump life are optimized.

Non-Clog Pumping With Minimum Solids Degradation

With the induced flow of a Non-Clog Vortex Impeller being recessed from the casing, velocities are low. Contact by solids with the impeller is reduced. Wear rate, solids degradation and shearing of liquid are greatly minimized. The Vortex Non-Clog casing design is able to handle solids in liquid suspension. Any substance that can exit the discharge will pass through the pump without clogging.

Vertical Heavy Duty Pumps

EC Enclosed Column Centrifugal

Heavy Duty Construction

Features...

- Eliminates Mechanical Seal Failure Problems
- Enclosed Column for external Tank Mounting
- Flow Rates up to 10,000 GPM
- Heads up to 400 TDH
- Jacketed Ball Bearing Housing for High Temperature Applications
- Discharge Pipe, Extended Column Length Available
- Long Coupled or Integral Shaft Electric Motors
- 50/60 Hertz Operation
- 1750/3450 RPM

1. BRG RETAINER
2. LOCK NUT
3. SNAP RING W/ BEARING
4. CARTRIDGE

Applications...

- Spray Booths
- Industrial Spray Washers
- Filtration Systems
- Chemical Phosphate Systems
- Paint Systems
- Coolant Systems
- Machine Tool Industry
- Municipal Systems
- E-Coat Systems
- Recreation Parks
- Agricultural By-Products

Capacities...

Sizes in the EC Vertical Heavy Duty range from 1" to 8" discharge with heads up to 275 feet @ 1750 RPM. Capacities up to 2800 GPM. (3600 RPM Pumps are available by selection through a distributor or factory).

Materials of Construction...

The Gusher EC Vertical Heavy Duty is available with a selection of materials to meet any need. Pumps can be furnished with Cast Iron, Stainless and Stainless Fitted Construction.

28. Casing T-Bolt (4)
29. Strainer
30. Tailpipe Flange
31. Tailpipe Gasket
32. Tailpipe

Options...

- **Drive Options** include direct v-belt, right angle and variable frequency.
- **Spacer Pedestal** available to raise bearings from splashing or heat.
- **Suction Strainer** available.
- **Hard Iron Discharge Elbow** available.

Design Features Include...

- **Large Impeller Passages** to reduce wear, allow maximum solids handling.
- **Wider Sealing Areas** eliminate the need for wear rings.
- **Progressive Casting Wall Thickness** for maximum service life.
- **Sizes 1" through 16"**, capacities to 10,000 USGPM.
- **Open By-Pass** design feature will tolerate pump shut-off.
- **Single Volute, Single Discharge** to allow maximum solids passage eliminates need for hydraulic balancing, allows dry-running.
- **Cantilever Pump** has no packing, seals or bearings below the mounting plate.

Standard Power Frame Repair Kits

Available in Stainless or C-Roll Steel

Gusher stocks thousands of parts for your repair needs. Parts are available separately or in a cost saving kit.

Repair Kits Available...

- Parts 7-9 Stainless Steel or Cast Iron
- Sealed Upper and Lower Bearings
- Open Upper and Lower Bearings

1. Upper Bearing

2. Lower Bearing

3. Bearing Retainer

4. Bearing Hug Nut

5. Upper Oil Seal

6. Lower Oil Seal

7. Impeller Washer

8. Impeller Retaining Nut

9. Impeller Key

Kits do not apply to the non-adjustable power frames or any non-standard versions.

***When ordering parts, please specify Pump Model and Serial Number.

Ordering information

Order the Gusher Vertical Heavy Duty Pump to meet your needs by model number. The model number should be specified as follows...

EXAMPLE: For ordering a Vertical Centerline Discharge Pump with a 5" discharge and 6" diameter suction with a semi-enclosed impeller of 9" maximum, Iron construction with discharge piping, the model number would be: **CL-5x6-9SEL-CDM-A-P**

Materials of Construction

Material Designation	Type	Description
A	All Iron	Cast Iron construction
B	Stainless Steel	316 Stainless Steel wetted parts
C	Stainless Steel Fitted	316 Stainless Steel shaft and impeller

Motor Specifications

Please furnish the following information on all orders: Horsepower, Frame Size, Voltage, RPM, Hertz and Phase. If a special motor is required, please specify.

The **Barrel Mounted Pump** will accept a Nema Frame "C" Face Motor.

Note: If a motor is ordered it will be factory mounted unless otherwise specified.

We Can Help

Our Sales department will assist you in selection of the proper pump for your application. Call, write or e-mail with any and all questions.
