

## SMARTFLEX PUMPS

[www.haywardgordon.com](http://www.haywardgordon.com)

# THE PUMP OF CHOICE

## ROLLER OR SHOE TECHNOLOGY

Hayward Gordon SmartFlex pumps are available in both high and low pressure designs.

The SRP and LRP series pumps are fitted with roller technology that reduce hose stress and provide substantially increased hose life, don't require lubrication and consume less energy than the shoe type technology. Excellent for pressures up to 116 PSI.

When higher pressures to 232 PSI are required the STP series sliding shoe design is the pump of choice. The heavy duty STP pumps are the workhorse of the industry and can be found in some of the toughest applications.

Our hose technology is second to none and available in several materials. We also have food grade hoses and tubing.

## FEATURES

- Unique hose attachment
- Cooling fins increase hoseslife
- Commercially available Gear reducers
- Dry run capability
- +/- 1% metering accuracy
- Roller or Sliding Shoe technology
- Low cost HALAR coating for corrosive fluids
- Food grade hoses

## APPLICATIONS

### MINING

Underflow, ore slurry, nickel slurry, backfill, reagent metering, gypsum slurry, PAX, Copper Sulphate, coagulant.

### WATER TREATMENT

Sampling, sludge, lime slurry, ferric chloride, sodium hypochlorite, polymer, alum, sulphuric acid, biomass.

### FOOD AND BEVERAGE

Diatomaceous Earth, sugar concentrate, hop extract, honey, caustic, activated charcoal, vegetable oil, brine.

### CHEMICAL

Paper coatings, nitric acid, calcium carbonate, latex, ink, clay, aluminum silicate, barium hydroxide, paint.

# SRP Series

The Hayward Gordon SmartFlex SRP Series roller pumps are ideal for lower flows. The pumps are available with reinforced hose for pressures to 116 PSI or more economical tubing for pressures to 30 PSI.

The pumps are available with NPT or Tri-Clamp connections in SS and PVC

## PERFORMANCE TABLE

# STP Series

## SLIDING SHOE PUMP

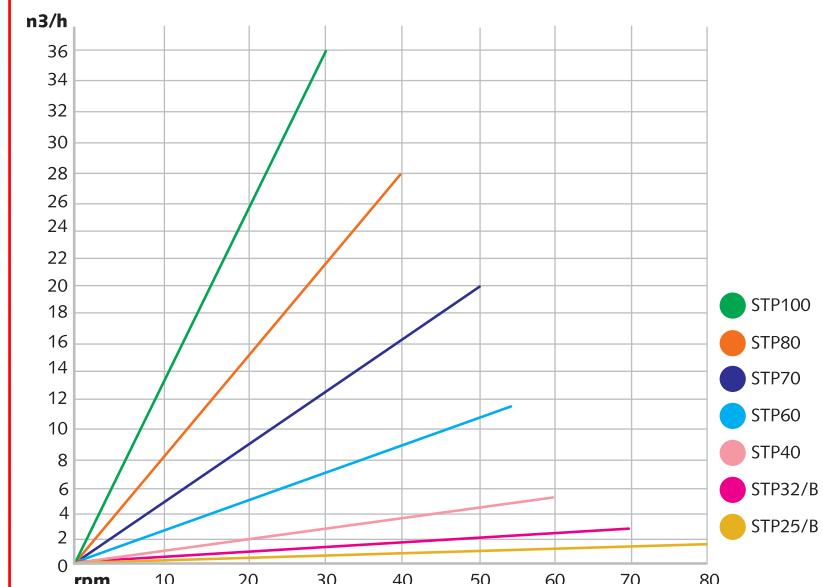

The Hayward Gordon SmartFlex STP Series sliding shoe pump is the idea pump for tough applications requiring high flow and high pressure. The pump is capable of delivering flows to 220 USGPM at pressures up to 232 PSI. The design includes a bearing placed directly under the pump rotor eliminating overhung load.

## FEATURES

- Commercially available gear reducers
- HALAR Coating for corrosive environments
- Unique hose attachment eliminates need for clamps
- Integral cooling fins extend hoseslife
- Run Dry capability
- +/-1% metering accuracy
- Simplex and duplex models available

PERFORMANCE TABLE

# LRP Series

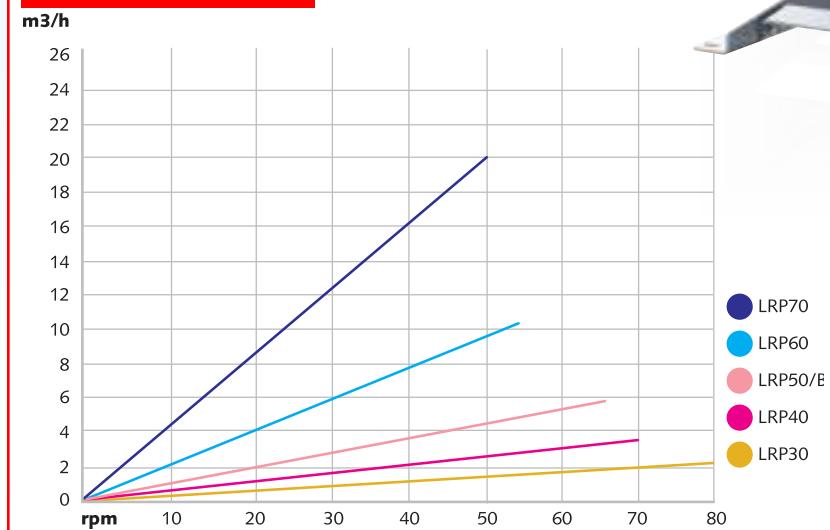

## ROLLER TECHNOLOGY PUMP

The Hayward Gordon SmartFlex LRP series roller technology pumps are ideal for low pressure applications. The rollers impart lower stress on the hose and increases the hose life dramatically. The pumps do not require lubrication and are ideal where contamination is an issue. The rolling action is more efficient than the sliding shoe and consumes less energy. The design includes a bearing placed directly under the pump rotor eliminating overhung load.

### FEATURES

- Lower hose stress results in longer hose life
- No Lubricant required
- Commercially available gear reducers
- Hose leakage detector
- Food grade hoses
- NPT, Flange and Tri Clamp connections in 316SS and PVC

# CTM Series

The Hayward Gordon SmartFlex CTM Series Industrial Tube Metering Pump is ideal for low flow and low pressure metering. The tube is easy to replace and comes in 6 different sizes to meet varying operating conditions with the same pump. As with all our peristaltic pumps, the CTM pump easily handles shear sensitive or solids laden slurries.

## FEATURES

- Large turndown Ratio
- Commercially available gear reducers
- Integral frequency converter
- Profibus DP technology

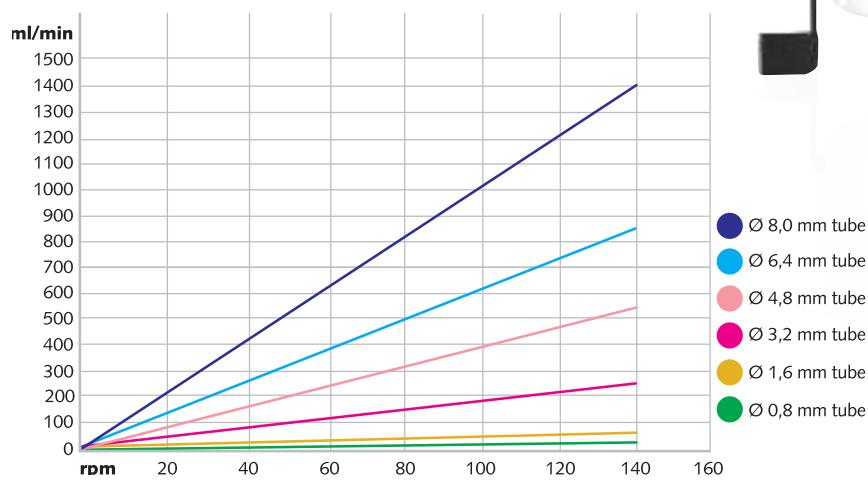

### Types of tubes available

Silicone  
Norprene® A-60-F  
Tygon®  
Norprene® A-60-G  
Solva®

### Internal tube diameters available

Ø	ml/rev.
0.8 mm	0.16
1.6 mm	0.40
3.2 mm	1.66
4.8 mm	3.80
6.4 mm	6.26
8.0 mm	10.00
