

GreenLine - GLM

MECHANICAL DIAPHRAGM METERING PUMP

PULSAFEEDER.COM/GREENLINE-PUMP

Max Flow: up to 824 gph (3,120 lph)

Pressure: up to 175 psi (12 bar)

Temperature: 32 - 113°F (0 - 45°C)

Accuracy: +/- 2% of Set Point

 **PULSAFEEDER®**

MECHANICAL DIAPHR

PULSAFEEDER EXPERTISE

For over 80 years, Pulsafeeder, Inc. continues to be a proven leader in diaphragm and dosing metering technologies. With extensive experience in providing fluid handling solutions, our pumps and systems are designed to handle your toughest applications. Known for their rugged construction and dependable performance, our products are of the highest level of manufacturing excellence and quality control.

PULSA® GLM SERIES PUMPS

Our Pulsa GLM series is a mechanically actuated diaphragm metering pump, designed to be reliable, robust, efficient, and compact. It features an industrial design to work in just about any application or environment. If you are looking for a high value chemical transfer or dosing metering pump with low cost of ownership, GLM is an outstanding choice. This latest pump series from Pulsafeeder can handle a wide range of flows and process chemicals.

MATERIALS OF CONSTRUCTION

Wet End Materials: PVDF, 316L Stainless Steel
Diaphragms: Composite PTFE
Check Valves: Ceramic or Stainless Steel

Housing: Epoxy Painted Aluminum
Lubrication: Oil Bath
Hardware: Stainless Steel

DM 1-2

DM 3-4

DM 5-6

DM 7

Design Feature	Customer Benefit
Robust industrial design	Long pump life, low cost of ownership
Auto stroke adjustment lock	Accurate chemical dosing
Leak free wet end with secondary sealing	Safety, no clean up or environmental risks
Toolless valve and connection options	Fast and easy installation and servicing
Multiple KOPkit® service options	Proper level of maintenance with minimized cost
Epoxy paint and ETFE coated heads	Chemical resistant and protected from the environment
Fully sealed outdoor-duty gearbox	Sealed and protected from harsh environments
Oil sight glass	Quick maintenance checks
Never-seize coupling	Allows for quick and easy removal of motor

MARKETS & TYPICAL APPLICATIONS

Markets

- Water Treatment
- Wastewater Treatment
- Cooling Towers Boilers
- Power Generation
- Chemical
- Petrochemical
- Food and Beverage
- Pharmaceutical
- Mining

Typical Applications

- Acids
- Caustics
- Polymers
- Bleaches
- pH Control
- Solvents
- Dyes / Inks
- Catalysts
- Cleaning Agents

AGM METERING PUMP

PRODUCT SPECIFICATIONS

 Max Flow: up to 824 gph (3,120 lph)	 Pressure: up to 175 psi (12 bar)	 Process Temperature: from 32 - 113°F (0 - 45°C)	 Accuracy: +/- 2% of Set Point
Min Flow: 3.2 gph (12 lph)	Suction Lift: 10 ft (3 m)	Ambient Temperature Range: from 32 - 113°F (0 - 45°C)	
 Stroke Adjustment: 0-100%, resolution 1.0%, Auto-locking	 Standard Viscosity: up to 1,000 cPs	 Modular Connections: Threaded, Flanged	 Chemical Compatibility: PVDF, 316L SS, PTFE & Viton wet end component options
	NPIP Pressure: 5 psi (0.4 bar)		

DIAPHRAGM TECHNOLOGY

A diaphragm reciprocates at a preset stroke length, displacing an exact volume of process fluid. Diaphragm retraction causes the product to enter through the suction check valve. Diaphragm advancement causes the discharge of an equal amount of the product through the discharge check valve.

HEAVY DUTY DIAPHRAGM

LEAK FREE PUMP HEAD

The safe diaphragm sealing design ensures no leakage.

The check valve with multiple O-ring seals can effectively prevent the leakage of chemicals.

The heavy-duty pump head support bracket design ensures the torque of the pump head bolts and prevents loosening.

There are multiple liquid end material options available, compatible with a wide variety of chemicals to insure leak-free dosing.

LEAK DETECTION (OPTIONAL)

Safeguard your pump and system from costly product loss and equipment damage.

The leak detection double diaphragm option comes with a pressure gauge and switch to monitor the diaphragm integrity.

The two diaphragms give you superior protection from a diaphragm failure.

FEATURES & BENEFITS

GEARBOX

- Compact and lightweight - saves space and easy to handle
- Fully sealed, non-vented gearbox design prevents ingress of contaminants
- Oversized, shielded bearings for long life and reliability
- Robust industrial hex-head SS hardware suitable for harsh industrial uses

MOUNTING FEET

- Flat and solid uniform mounting feet - extend outside of the gearbox for stability
- Oversized, slotted mounting holes to accommodate various fasteners
- With motor installed, pump will not tip over prior to installation

DRIVE

- Sealed upper worm bearing extends gear and motor life, reduces noise, and maximizes pump efficiencies by ensuring full torque output
- Motor flange drain path redirects liquids away from seal and eliminates pooling / resting on seal or motor shaft connection
- Non-metallic, never-seize motor coupling prevents sticking or "welding" of worm shaft to motor shaft allowing for ease of motor installation / removal
- Highly efficient, heavy-duty drive train maximizes uptime and reduces total cost of ownership
- Maximize operating range and remotely control with variable frequency drive and motor (optional)

OIL LUBRICATION

- Oil bath for normal or explosion proof areas - lubricates all internal moving parts to extend pump life
- Easy and accessible oil fill location - obstruction free and visible

WET END & CONNECTIONS

- Standard materials: PVDF, 316L SS
- Stainless Steel hardware for added chemical resistance
- Four bolt tiebar (316L models only)
- Standard FNPT and ANSI Flanged connections

LEAK FREE HEAD

- Secure diaphragm sealing technology provides leak free service and chemical containment
- Secondary O-ring seal offers worry free valve sealing and eliminates chemical spray
- Retention plate ensures pressure containment (hydrostatic and creep elimination) and allows for proper head bolt torque without loosening over time

HEAVY DUTY DIAPHRAGM

- Flat mechanically actuated diaphragm delivers reliable pumping action and long life
- Double sided PTFE coated composite diaphragms maximize chemical resistance and diaphragm lubrication
- Multiple diaphragm sealing beads prevent leakage in industrial applications

CHECK VALVES

- Spherically uniform velocity valving limits turbulence, provides superior solids handling and is auto-flushing. Flow is routed evenly without risk of cavitation
- O-ring valve seat (soft seat) for improved priming, less noise, and better solids / slurry handling (not available in 316L configurations)

STROKE CONTROL

- 10:1 turndown standard
- 0-100% stroke range (while on or off) in one complete revolution
- Auto-lock stroke position, drift free - maintaining proper flow

SERVICING

- Toolless valve removal for simple servicing
- The pump head connector does not require a separate nut, making installation and maintenance more convenient
- Easy oil fill and drain
- Oil sight glass for fast inspection of oil and operation
- Ease of maintenance - common hardware, no special tools required
- Never-seize, non-metallic motor coupling for fast disconnect

PULSALube is the only oil Pulsafeeder recommends for use in our pumps. PULSALube is a superior blend of oils designed to provide optimal lubrication and extend equipment life. It maintains your pump warranty.

We offer KOPkit® (Keep on Pumping kits) designed to guard against unnecessary downtime and assure the highest level of efficient and uninterrupted service from your GLM® pump. In the event of a breakdown, one kit will put you back in business fast!
