FOOD & BEVERAGE

PROCESS EQUIPMENT, SOLUTIONS, & SERVICES

We Know Food & Beverage

In the dynamic and fast-paced Food & Beverage industry, facilities face a variety of challenges that can impact both profitability and operational efficiency. From managing delicate ingredients to ensuring hygiene and product consistency, operators must navigate complex processes to maintain high-quality standards and reliability. At Anderson Process, we understand these unique challenges and are committed to providing process equipment built to last.

Expertise You Can Trust

- 175+ Process Equipment Professionals
- Application and Systems Engineers
- Dedicated Product Managers and Support Staff
- Comprehensive Process Equipment Experience and Knowledge
- Customer-Driven Integrated Solutions Approach
- Committed to the Profitability of our Clients

Technology to Serve You Better

- Streamlined Ordering Through E-commerce
- Electronic Data Interchange (EDI) Capabilities
- Order Tracking and Inventory Management
- RFID-Driven Automated Tracking Systems
- Comprehensive Invoice and Quoting Systems
- 2D/3D CAD Modeling Services

Streamlining Your Process

- Integrated Solutions Across All Process Equipment Categories
- One Source Supplier for Your Process Needs
- Product Recommendations that:
 - Reduce downtime
 - Drive yield output
 - Lower maintenance costs
 - Increase Mean Time Between Failures (MTBFs)
 - Enhance profitability

Value-Added Services

To further enhance the longevity and efficiency of your process equipment, our value-added services include custom skid engineering, fabrication, comprehensive aftermarket pump repair, hose tracking, testing, and refurbishment programs. These services safeguard your investment and maximize the performance and value of your equipment, helping you maintain peak efficiency throughout your operation.

Food & Beverage LINE CARD

Pumps

Hose & Fittings

Filtration

Vacuum Pumps & Blowers

Process

Not all products available in all locations

PUMPS

HYGIENIC CENTRIFUGAL

Low-viscosity
Juices, Milk, Beverages

TWIN SCREW

Thin to High-viscosity
Beverages, Chocolate,
Syrup, Oils

AIR-OPERATED DOUBLE DIAPHRAGM

Low-shear, Thin to High-viscosity
Solids handling, Sauces, Oils,
Condiments

ELECTRIC-OPERATED DOUBLE DIAPHRAGM

Low-shear, Hygienic
Solids handling, Sauces,
Oils, Condiments

ECCENTRIC DISC

Seal-less, Product Recovery
Juices, Sauces, Confections,
Syrups, Creams

CIRCUMFERENTIAL PISTON

Thin to High-viscosity
Condiments, Syrups,
Sauces, Oil, Yogurt

PROGRESSIVE CAVITY

Solids Handling, High-viscosity
Peanut Butter, Sauces, Dairy,
Meat/Fish, Confections

HYDRO-TRANSPORT

Produce Transport
Peas, Corn, Beans, Pickles,
Potatoes

SUBMERSIBLE

Fluid Transfer, Drainage
Wastewater, Tank Draining

INTERNAL GEAR

High-viscosity
Oils, Syrups, Molasses

MULTI-STAGE CENTRIFUGAL

Low-viscosity, High-pressure
Sanitation, Steam
Generation, Beverages

PERISTALTIC

Low-shear, Precise
Sauces, Slurries, Chemicals

HIGH-TEMP CENTRIFUGAL

Fluid Transfer, Drainage
Hot Water, Oil

PILOT TUBE

High-pressure
Washdown, Sanitation

SELF-PRIMING CENTRIFUGAL

Air Pocket Handling
Wastewater, Tank Draining

ANSI CENTRIFUGAL

Low-shear, Precise
Water, Slurries, Chemicals

PROCESS EQUIPMENT

UNLOADERS

Piston, AAOD, Twin Screw

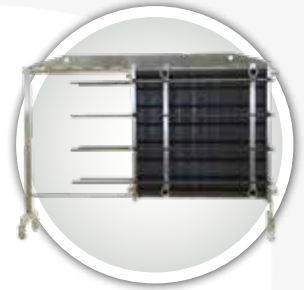

VACUUMS & BLOWERS

Wet/Dry, Central & Portable
Vacuums, Food-Grade Blowers

FILTRATION

Bags, Cartridges, Housings,
Custom Systems

HEAT EXCHANGERS

Plate & Frame, Shell & Tube,
Air-Cooled, Custom

IN-TANK MIXERS

Clamp-on, Top-entry,
Bottom-entry, Side-entry

HIGH-SHEAR IN-TANK MIXERS

Dissolve, Homogenize,
Disperse, Emulsify

INDUCTION SYSTEMS

Mixing powders into liquid

HOMOGENIZERS

High-pressure, High-shear,
Ultra Sonic, Colloid Mill, Valve

HOSE, FITTINGS & ACCESSORIES

FOOD & BEVERAGE HOSE

FDA, USDA, & 3A
Edible liquids & solids (Dairy,
beverages, syrups, ingredients)

CHEMICAL HOSE

OSHA, REACH, & RoHS
Aggressive and hazardous
chemicals

AIR & MULTI-PURPOSE HOSE

Durable, Light, Flexible
Air transfer, water delivery,
and light chemical handling

THERMOPLASTIC HOSE

Non-reactive, Hygienic
Hydraulic systems, high-
pressure applications

INSTRUMENTATION

Flowmeters, Pressure Gauges,
Sensors & Transmitters, etc.

CLAMPS & COUPLINGS

Sanitary Hose Clamps, Quick
Disconnect Couplings, etc.

VALVES

Sanitary Ball, Butterfly,
Globe, Pressure Relief, etc.

WASHDOWN EQUIPMENT

Low-flow & Heavy-duty spray
guns, steam cleaning, etc.

CUSTOM FOOD & BEVERAGE SOLUTIONS

ENGINEERING, DESIGN & BUILD SERVICES

Our custom skid design services enable fluid-processing applications facing unique challenges to deploy optimized equipment solutions. Our experienced application engineers and technicians work closely with customers to understand both their current processing issues and long-term production goals. They then design and fabricate a process skid constructed of industry-leading OEM parts engineered to streamline operations, drive efficiency and enhance production yield.

FDA FOOD PRODUCT TRANSFER

Customer:

Food & Packaging

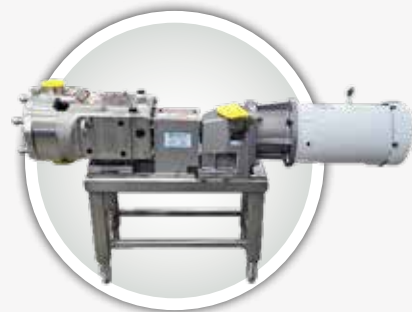

Problem:

The customer required a mobile solution for pumping food product from multiple locations within their facility

Solution:

We fabricated this custom portable air-operated double diaphragm pump cart with a mounted a Wilden Hygienic Series 1" pump on a portable stainless steel cart with 2" square tubing. The cart includes a RTi-PBE filter regulator, Dixon Valve air shut-off valve, Tudertecnica Glidotech product hoses and a Continental Contitech air hose. Along with the key components, the cart has a hose rack and heavy-duty 6" casters to easily maneuverable through the production facility to service multiple applications.

MAPLE SYRUP TRANSFER

Customer:

Food Production

Problem:

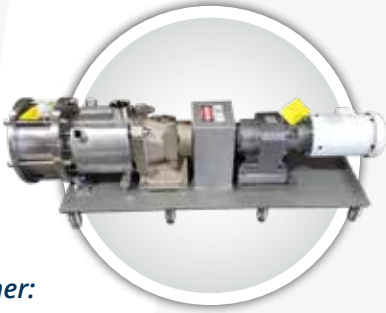

The customer needed to efficiently transfer maple syrup

Solution:

We delivered a custom pump assembly using the Ampco ZP Series pump. This pump is designed to handle syrup at 30-40 GPM and 80-100 PSI, depending on viscosity.

We mounted the pump horizontally to make installation easier and improve drainability. It's powered by a 5 HP Baldor motor and a Nord Helical Gear Reducer for smooth operation. The whole setup stands on its own with 1" and 2" stainless steel square tubing, plus adjustable stainless-steel legs for added flexibility.

CHOCOLATE & FLAVORINGS

Customer:

Food Production

Problem:

Customer needed to reliably pump chocolate and flavorings throughout their facility

Solution:

We delivered 8 pumps skids in total, with pumps ranging from Mouvex's large SLS36 (up to 158 GPM), down to their model SLS12 (just over 50 GPM). The pumps were all fitted with Jacketed heads to keep the Chocolate/Flavorings at a consistent temperature. The systems utilized Baldor washdown duty motors and Nord Gear boxes. They were mounted on 304 Stainless Steel bases with adjustable feet for additional stability.

VEGETABLE TRANSFER

Customer:

Food Processing

Problem:

Customer needed to reliably pump carrots through facility

Solution:

We used 4" Cornell food processing pump assembly built on a custom stainless steel frame and powered by a 7.5 HP Toshiba motor to deliver the turnkey solution. The unit can pump up to 825 GPM and is built with an offset volute and enclosed, single-port impeller to pass product without damage.

The pump was attached to a custom-fabricated Hydro-Transport product tank that was built to help move product into the pump.

PORTABLE DISTILLERY PUMPS

Customer:

Distillery

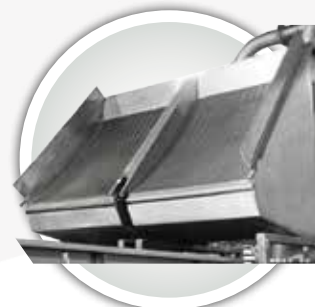

Problem:

A start-up distillery needed portable pumps to pump different products into tanks

Solution:

We supplied two versatile pumping systems for efficient product transfer. The first system included five Ampco sanitary centrifugal pumps, each equipped with WEG variable speed drives (VFDs) mounted on. The second featured three 1-inch Wilden FDA pumps with air filters and regulators. To enhance mobility, both systems were mounted on stainless steel carts with food-grade wheels and a glass-beaded finish. With these portable solutions, the distillery can now seamlessly and efficiently pump various products into their tanks.

VEGETABLE WASHING & TRANSFER

Customer:

Food Processor

Problem:

Customer needed to efficiently wash and transfer pickles for further processing.

Solution:

We helped design and build these all-stainless-steel hydrosievs. The wedge wire screen is 60" wide, with .125"-wide slot openings. The product falls over the top of the screen while water falls through the screen into a tank.

The system was completed with Cornell pumps sending product through the hydrosieve. There is a 6" flanged inlet into the Hydrosieve and an 8" flanged discharge out of the bottom.

*Leverage our experience & expertise to enhance
the profitability of your fluid processes.*
