

Extend Bearing Life with Lubrication Oil Filtration Skids

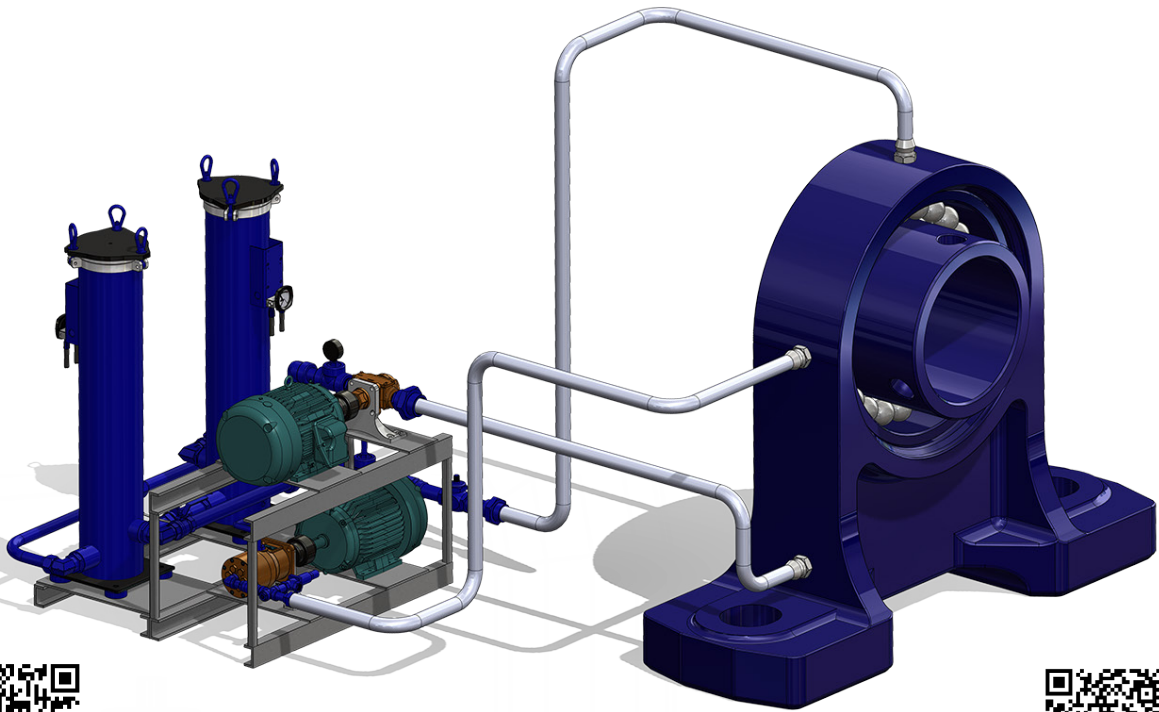

Throwback meets innovation! We upgraded a lubrication skid design originally built by Anderson Process for Allis Chalmers back in the 70s. This modernized skid supplies lube oil to a large bearing in concrete production equipment. **We can design our skids to meet your specific lube oil ISO requirement to ensure longer bearing life.**

The system features:

- Haight internal gear pump
- Dynex high-pressure pump
- Dual Donaldson Hy-Pro filter housings

All mounted on a custom-fabricated c-channel base plate with carbon steel piping.
